Introducing the new Range of Rubber Tiles

EPDM RUBBER FLOOR TILES PRODUCT CATALOGUE

Greener, Safer and more Eco Friendly planet.

Innovation and up-gradation has been the ongoing process and focus of ALP Group. The latest development in this is introduction of Rubber tiles. Unlike the pigmented recycled top of rubber tiles, available in the market,ALP Rubber Tiles top layer is processed from virgin EPDM granules. These virgin EPDM granules ensure superior performance at differential cost.

The ALP Rubber tiles are suitable for applications that require high level of durability and abrasion resistance as well as natural cushioning qualities of rubber

Features and Benefits:

- Slip resistant
- Easy to Clean and Maintain
- Excellent sound absorption – quiet to walk on
- Comfortable, Durable and long life
- Easy to install
- Inexpensive to maintain
- Available in variety of colours
- High quality flooring suitable for withstanding heavy foot traffic.
- Environment friendly and virgin EPDM granules
- UV resistant.
- Anti-fungal and anti-microbial
- Shock resistant, electrical and thermal insulator and static charge resistant
